V1 · THE PRODUCT MANAGEMENT PIPELINE

Evidence to decision.

From customer voice to a requirement a PM can defend.

1

Collect

BMW feedback, NHTSA, owner forums, web

2

Link

Every row kept word for word

3

Propose

Requirements from recurring needs

4

Score

Priority beside evidence grade

5

Decide

The PM approves an exact version

New evidence → **Only affected proposals reopen**

Every requirement has to survive three questions.

1. Where did it come from?
2. How sure are we?
3. What changed since we decided?

V2 · THE MULTI-AGENT SYSTEM

Agents prepare.

Agents do the legwork. Only a PM decides.

Plan

An orchestrator, one step at a time

Delegate

Scoped specialist agents

Log

Every step a recorded task

Refuse

No agent can approve

Agents prepare. Product managers decide.

Automated
Import, link to source, score

Surfaced
Weak evidence and assumptions

PM only
Every decision, fully audited

Samples, not market share
